Schedule

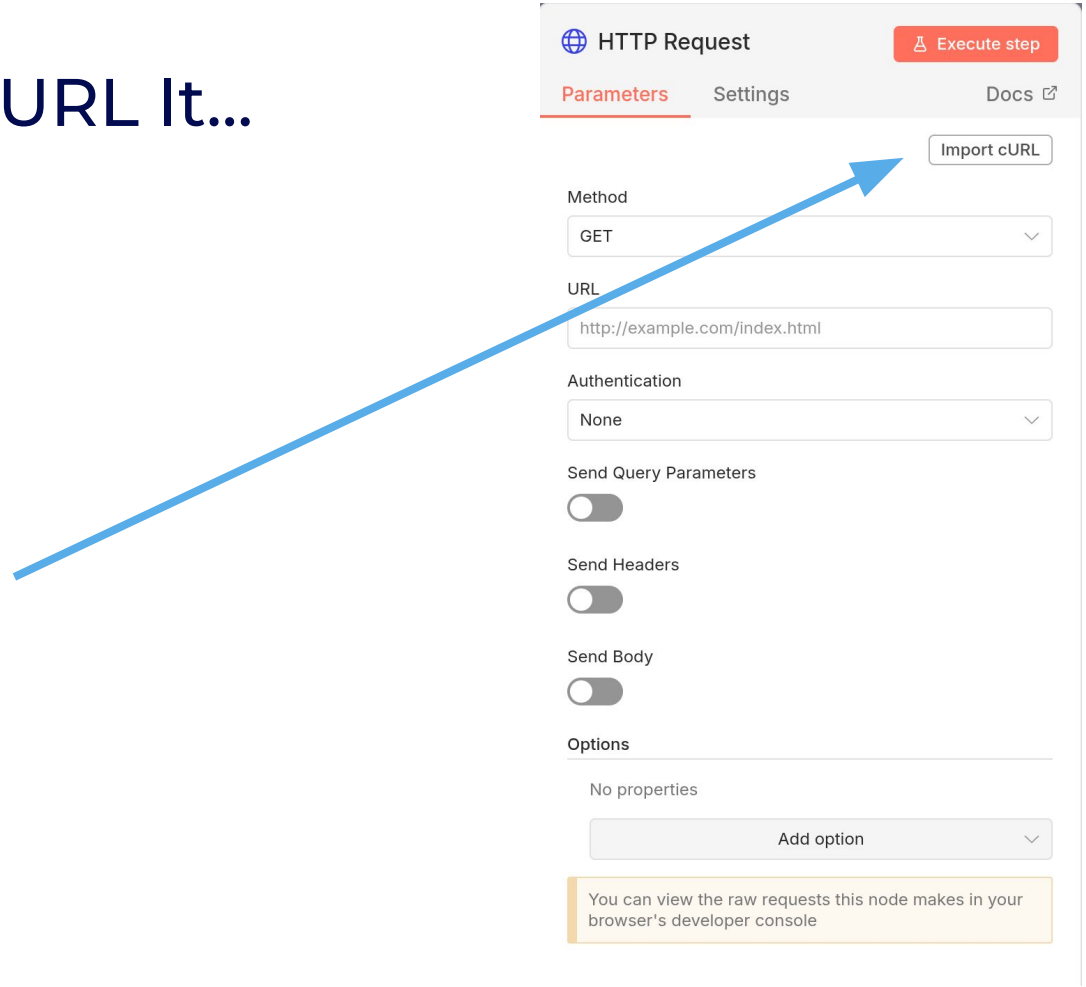

9:00 - 9:30	Module 0: Introduction to Agentic AI
9:30 - 11:30	Module 1: Foundational Agentic Patterns with n8n
11:30 - 1:00	Module 2: Advanced Patterns & Custom API Integration
1:00 - 2:30	Module 3: LLM Evaluation with Braintrust
2:30 - 3:00	Awards!

Module 2: Advanced Patterns & Custom API Integration

Going Beyond Integrations: HTTP Request

- One of the most versatile nodes in n8n
- Queries data from any app or service with a REST API
- Lets you fetch APIs, scrape web pages, and integrate services that don’t have a dedicated n8n node
- Supports various HTTP methods like GET, POST, PUT, DELETE, etc.
- Can be used as a regular node or as a tool to an agent

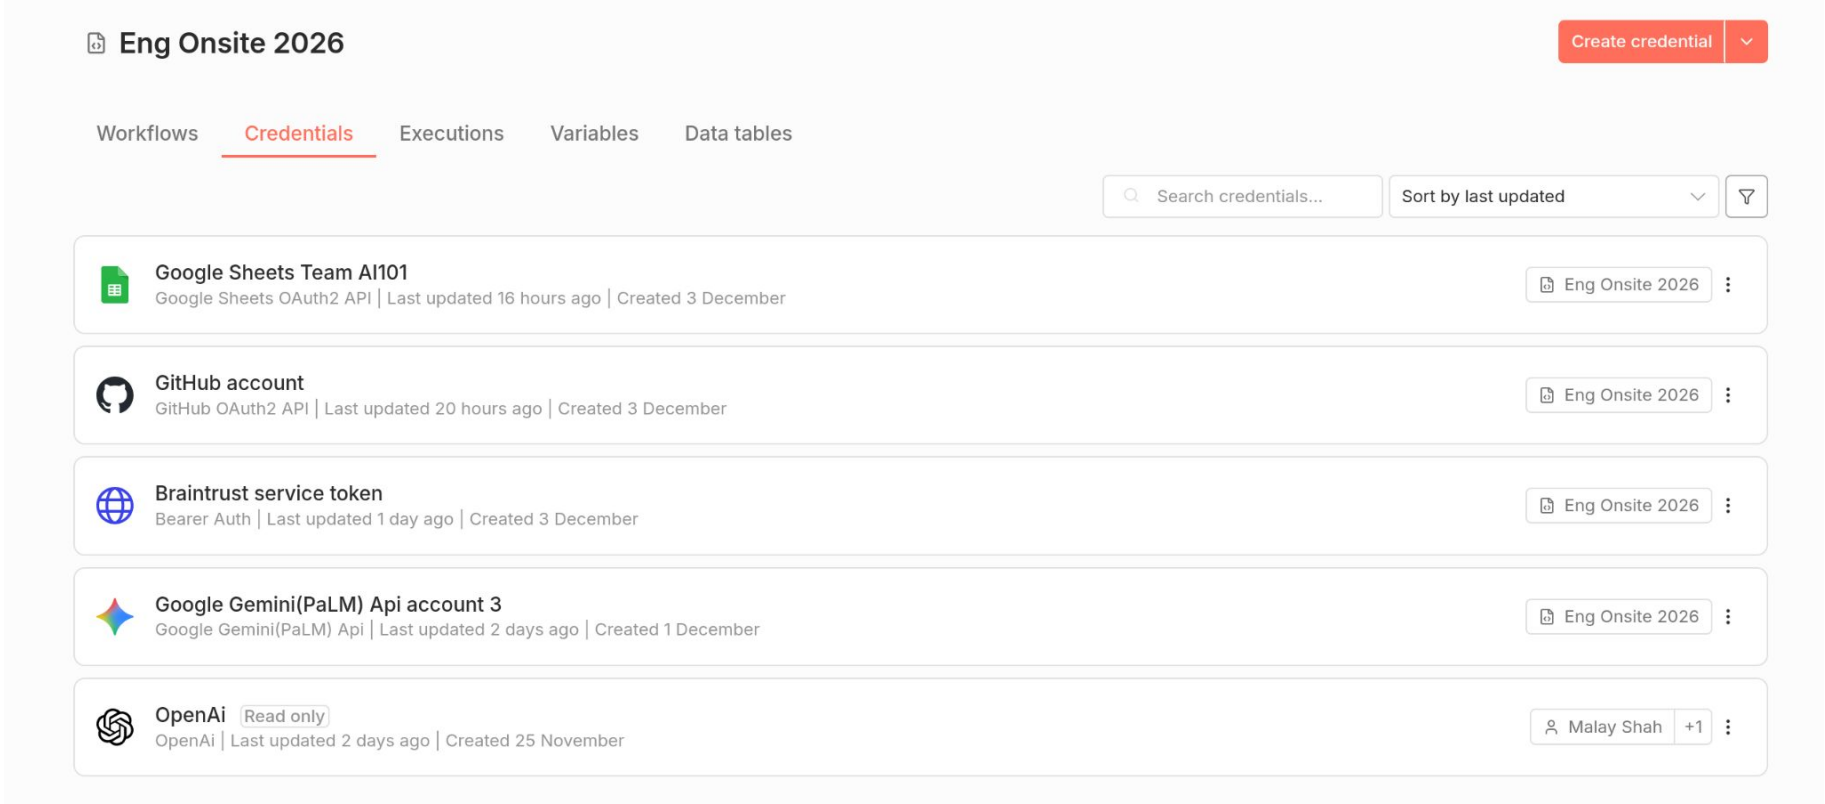

If You Can cURL It...

Authentication

- Predefined credentials
- Generic credentials
  - Basic auth
  - Custom auth
  - Digest auth
  - Header auth
  - OAuth1
  - OAuth2
  - Query Auth

Store Your Credentials Properly

Send...

- Query parameters
  - Filters on HTTP request
  - Uses either key-vaue pairs of query parameters or JSON
- Headers
  - Metadata or context about your request
  - Uses either key-vaue pairs of query parameters or JSON
- Body
  - Sends data with request
  - Choose from multiple content types: Form URLencoded, Form-Data, JSON, Binary File, or Raw

Node Options

- Array format
- Batching
- Response format
- Pagination
- Redirects and timeouts
